

What Is iTrainStation...

- A web based learning platform with four unique levels of service.
- An intuitive, easy to use graphical interface enhances the learning experience.
- A robust reporting engine that includes automated, scheduled reporting capabilities.
- Technical Support for all users included with all service levels at no additional charge.

Pay Per View...

- Specially designed for organizations with lending libraries.

- Each member can obtain access while maintaining strict control over the amount of use and the budget.

Classic Service...

- Think Netflix® for the corporate world.
- Designed for traditional classroom style training.

LMS Lite...

- An affordable entry level LMS for small to medium sized organizations.
- Assign a course to a group of individuals, or a group of courses to an individual.

Platform Plus...

- Integrate the Platform into your own web portal creating a trusted environment for employee learning.
- The 3 dimensional user management offers complete flexibility in creating groups for in-depth control of scheduled training.
- So much automation that it's like having a free employee doing all the work for you.
- Includes a powerful built in Course Editor allowing for the easy creation of organizational specific training.
