# Cost Effective Solutions To Train Any Need In Any Environment...

## Key Features...

- A web based training system that has been under daily development since 2006.
- Configurable solutions that are designed to offer the greatest amount of functionality for even the most budget conscious of organizations.

- Easily upgrade to enhanced services without loss of data.
- The entire project has been developed and managed in house, offering precise control over functionality and enhancements.
- There are no third party developers involved, allowing for user requested enhancements to be implemented immediately.
- Implementation of user requested features, suggestions and ideas is why this Learning System is being called, **"The Platform"**.
- Platform enhancements become a shared benefit to the entire user community without any additional costs.
  - A robust, flexible and scalable system built on a concept of 'switches' allowing for an infinite array of configurations, functions and detailed control over organizational training.
  - A rare solution that also includes a very large selection of quality content not found in most Learning Management Systems.
- New stimulating, quality content is added regularly.
- Programs are reviewed for quality and adherence to current compliance standards.
- All courses come equipped with a quiz, providing an essential benefit to trainers.
- Organizations can customize the quiz making their own individual learning experience unique and specific to their own environments.
- A simple, easy to use Course Editor is built in—eliminating the need for expensive, difficult to use software.
- The Platform offers trainers the ability to incorporate their own private content.
- Engineered to be compatible with the technologies of the past as well as the mobile computing needs of the future.
- No need to install any special apps or programs - the perfect solution for secure networks and environments.
